District Scorecard Glossary of Terms

Category	Subcategory	Measure	Definition
Academic Milestones	Early Learning Foundations	Kindergarteners demonstrating readiness to be successful learners	Of kindergarten students who were tested in all six domains of the Washington Kindergarten Inventory of Developing Skills (WaKIDS) assessment in the fall of their kindergarten year, the percentage who demonstrated characteristics of entering kindergarteners in all six domains. More information about the WaKIDS assessment can be found here: http://www.k12.wa.us/wakids/
		3rd graders demonstrating grade level proficiency in English language arts	Washington students are tested regularly by the state to assess their progress as they move through school. State tests include Smarter Balanced assessments (SBA) for English language arts (ELA) and mathematics and the Measurements of Student Progress (MSP) for science. For each test and grade level listed, the percent of students demonstrating grade level proficiency is equal to the number of students who earned passing scores (based on the cutoff the state defines as “meeting standard”) divided by the total number of students required to take the test (not including students with valid exemptions). Grade levels are students’ grades as of June 1 of the testing year.
		3rd graders demonstrating grade level proficiency in mathematics	
	5th graders demonstrating grade level proficiency in science		
	7th graders demonstrating grade level proficiency in English language arts		
	Core Academic Development	7th graders demonstrating grade level proficiency in mathematics	8th graders demonstrating grade level proficiency in science
		8th graders demonstrating grade level proficiency in science	
	On-Time Graduation	9th graders earning sufficient credits	This measure is calculated by dividing the number of 9th grade students who earned at least 5 credits during the school year by the total number of 9th graders.
		10th graders passing all state exams required for graduation	Of students who were in 10 th grade as of June 1, the percentage that have passed all state tests or state-approved alternatives to testing required for graduation in the areas of math, English language arts, and science. For more information about testing requirements for graduation see: http://www.k12.wa.us/assessment/StateTesting/default.aspx
		High school students graduating in four years or fewer	The percentage of students who graduate within 4 years as determined by their ‘Class Of’ or ‘cohort’ year, which is set when students first enter 9th grade. It is calculated by dividing the number of students who graduated within 4 years (or the ‘on time’ cohort) by the total number of students in each high school cohort of the given reporting year. (Students who transfer out of the district are not included in the total number.)
	College & Career Readiness	Students taking and passing the district algebra course by 8th grade	Of students who were in 8 th grade as of June 1, the percentage who took and passed Algebra 1B in any year during middle school.
		Students taking and passing a college level course by 12th grade	Of students who were in 12 th grade on June 1, the percentage who received a passing grade in one or more of the following types of courses in any year during high school: Advanced Placement (AP), International baccalaureate (IB), Running Start, and College in High School.
		11th graders demonstrating college and career readiness in English language arts	No baseline figure is produced on the District Scorecard due to low participation rates on the 11th grade Smarter Balanced state assessment in 2014-15. This measure should be available in future years after these assessments become graduation requirements and participation rates increase. Results for 11 th grade state assessments are reported for each school and the district as a whole on OSPI’s Washington State Report Card website and on SPS School Reports (available in December 2015).
		11th graders demonstrating college and career readiness in mathematics	

District Scorecard Glossary of Terms

Category	Subcategory	Measure	Definition	
Commitment to Equity	Opportunity Gaps	Opportunity Gap in grade level English language arts proficiency (3rd-8th grades)	<p>To establish a single equity measure to benchmark our annual progress in closing opportunity and proportionality gaps, we use the difference in outcomes between the following two student groups:</p> <ul style="list-style-type: none"> Opportunity Gap Students — African-American, Hispanic/Latino, Native American and Pacific Islander students — belong to historically underserved race/ethnic groups that have had limited access to the opportunities and supports that lead to college, career and life success. White and Asian-American students belong to race/ethnic groups that historically have had greater access to the opportunities and support that lead to college, career and life success. <p>Opportunity gaps in math and English language arts are based on combined average proficiency rates on state assessments for students in 3rd through 8th grade on June 1 of the reporting year. The opportunity gap measure is the aggregate proficiency rate for White and Asian students <u>minus</u> the aggregate proficiency rate for students belonging to an Opportunity Gap race/ethnicity (as defined above).</p>	
		Opportunity Gap in grade level mathematics proficiency (3rd-8th grades)		
	Proportionality Gaps	Proportionality Gap for students in special education programs (K-12th)		The percentage of students served by special education programs. The Proportionality Gap measure is the percentage for students with Opportunity Gap race/ethnicities minus the percentage for White or Asian students. (See above for definition of students included as Opportunity Gap ethnicities.)
		Proportionality Gap for students suspended or expelled (6th-12th grades)		Of students who were in 6 th to 12 th grade on June 1, the percentage who were suspended or expelled (suspensions include in-school suspensions). The Proportionality Gap measure is this percentage for students with Opportunity Gap race/ethnicities minus this percentage for White or Asian students. (See above for definition of students included as Opportunity Gap ethnicities.)
	Equitable Access and Opportunity	Students participating in a licensed pre-school program before kindergarten		No baseline figure was calculated this year, as business rules and data quality issues are being thoroughly reviewed to ensure accuracy and consistency in annual reporting.
		Students receiving instruction in arts/music and physical education (K-12th)		
Effective Teachers and Leaders	Equitable Access	Free/reduced priced meal students taught by a highly effective teacher		
	Annual Retention	Annual retention rate for highly effective teachers and leaders		
Positive School Environments	Climate/Learning Environment	Positive student responses to school climate survey	<p>The district administers annual climate surveys to all students, staff and families during the second semester of each reporting year. All students and staff take a paper survey in school whereas families are surveyed by phone or e-mail through the district School Messenger system.</p> <p>Each survey-based category represents the average positive responses for a subset of questions. The specific questions used for each measure are provided in the Appendix attached to the District Scorecard. Detailed climate survey results for each school including additional survey questions can be found at the School Reports web page: www.seattleschools.org /district/district_scorecards</p>	
	Student Motivation/Engagement	Positive student responses to motivation and engagement survey		
	School Professional Environment	Positive school staff responses to professional environment survey		
Stakeholder Engagement & Satisfaction	Family Engagement	Positive family responses to family engagement survey	<p>The percent of families responding to family engagement survey: Of households receiving a family survey through School Messenger, the percentage who responded to a survey for at least one student.</p> <p>The district also administers an annual customer satisfaction survey to school leaders (principals and assistant principals) and an annual community partner survey to direct service providers with formal contracts or memoranda of understanding through the Community Alignment Initiative or the School and Community Partnership Department.</p>	
		Percent of families responding to family engagement survey		
	Family Satisfaction	Positive family responses to district satisfaction survey		
		Positive family responses to school satisfaction survey		
	Quality Customer Service	Positive school leader responses to customer satisfaction survey		
Community Partnerships	Positive community organization responses to partner satisfaction survey
