

Internet Opt Out Form

Before gaining access to the District network, students are required to sign a Network Use Agreement which includes access to the District's network and access to the internet ([Board Policy No. 2022](#) and [Board Policy 3540](#)). Board Policy No. 3540 gives Parents/Guardians the choice of "opting out" of internet access.

Access to the District network will allow students to access their personal internet email accounts. If you do not want your child to access their personal internet email account, you can opt out. However, please be advised that by opting out of email, you will also be opting out of internet service, and your student will not have access to the internet at school.

If you do not want your child to have access to the internet at school, please check the box below, complete and sign the form and return it to the office at your child's school.

NO, I don't want my child to access the internet at school.

Student Name

Parent/Guardian Name

Parent /Guardian Signature Date

For school use

Sysop/Analyst has moved the student into the school's no Internet group

Sysop/Analyst signature

Date

(See the reverse side of this form for reference information on internet safety.)

Seattle Public Schools believes that students need to be proficient users of information, media, and technology to succeed in a digital world. It is the district's goal to provide students with rich and ample opportunities to use technology in schools for important purposes like collaborating on school projects, sharing and/or transferring files between school and home, and submitting assignments to instructors online.

However, along with technology and online resources comes the question of internet safety. It is of utmost importance to the district that all students be educated on the appropriate use of technology and online behavior. In addition to providing appropriate instruction to students on internet safety, SPS encourages parents and instructors to use the tools and tips found in Common Sense Media as they talk to students about technology and the internet.

Please visit www.common sense media.org for more information.
